Translation Solutions Development

2006~2007

- · VisualTran v1.0 · Registered as translation S/W Microsoft (MS) development · Joint research with (VisualTran
- Electronics and Telecommunications Research Institute (ETRI)
- 2008~2009
- Translation Partner Registration)
- · Signed a contract with The Boeing Company using IETM Translation system 2008

2010~2011

- Translation server solution (LKMS) v1.0 development
- · Provided translation server to Ministry of Land, Transport and Maritime Affairs and Ministry of Trade, Industry and Energy

2012~2013

- · Provided translation server to Defense Agency for Technology and Quality
- · Translation project management system V1.0 Development

2014~2015

- · Provided translation server to Ewha Womans University Interpretation & Translation Center
- · Joint research for cloud translation server development under supervision of Ministry of Science, ICT and Future Planning

2016~2017

- · Acquired ISO 9001 translation service and translation solution certification mark
- · Innobiz, venture company certification; established an attached laboratory for corporation
- · Tasks of Ministry of SMEs and Startups, Ministry of Science and ICT

Artificial Intelligence Translation Solutions Development + Translation Services

2018~2019

- · Translation service partnership with Kwangwoon University
- · Completed construction of translation service platform
- DB construction of translation corpus of National Information Society Agency (NIA)
- · Developed MTPE machine translation incremental learning platform

2020

- · Conducted National Information Society Agency (NIA) translation corpus
- · Signed a contract and began service of 144 translation service products for Public Procurement Service (Korea Online E-Procurement System MAS)
- · Developed MTPE machine translation incremental learning platform and launched AI legislation translation service

2021

- Conducted National Information Society Agency (NIA) translation corpus
- Provided VisualTran Mate to Ministry of Government Legislation (Used by Korea Law Information Service)
- Won AI voucher business contract for National IT Industry Promotion Agency (NIPA)

2022

- · Conducted National Information Society Agency (NIA) translation corpus
- · Won project contract for SME Technology and Innovation Development Business, Korea **Technology and Information** Promotion Agency for SMEs
- Won Al voucher business contract for National IT Industry Promotion Agency (NIPA)

MTPE Expert Translation Service through Technology and Human Convergence

While Language Service Providers (LSP) in each field translate the documents customers want to the highest quality in the computer-assisted translation platform using big data, computer translation support system (including industry-specific terminology database), and artificial intelligence machine translation system that will lead the 4th industrial revolution, we provide "translation services with technology and human convergence" that satisfy customers by reducing costs and increasing speed.

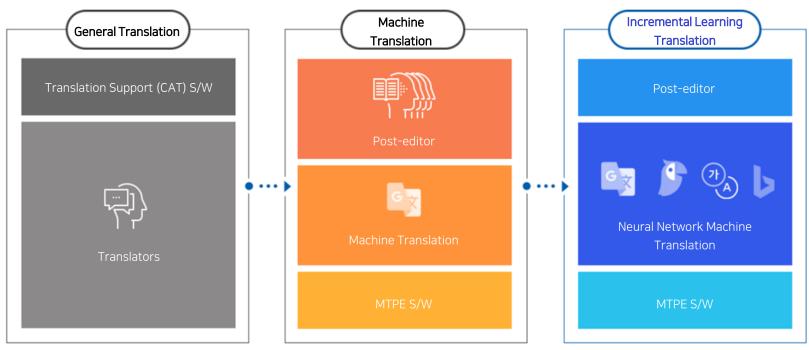

EverTran is an MTPE (Machine Translation Post Editing) expert translation service providing company that allows highly trained post-editing professionals to post-edit incrementally learned machine translation results to provide high-quality translation services at low costs.

Application of Incremental Learning

When basic data on a certain amount of corpus (source texts + translated texts) is built, the AI machine translation engine incrementally learns the data to improve the quality of machine translation provided to post-editors.

Neural network machine translation with incremental learning provides high quality machine translation, dramatically reducing post-editing to save time and money.

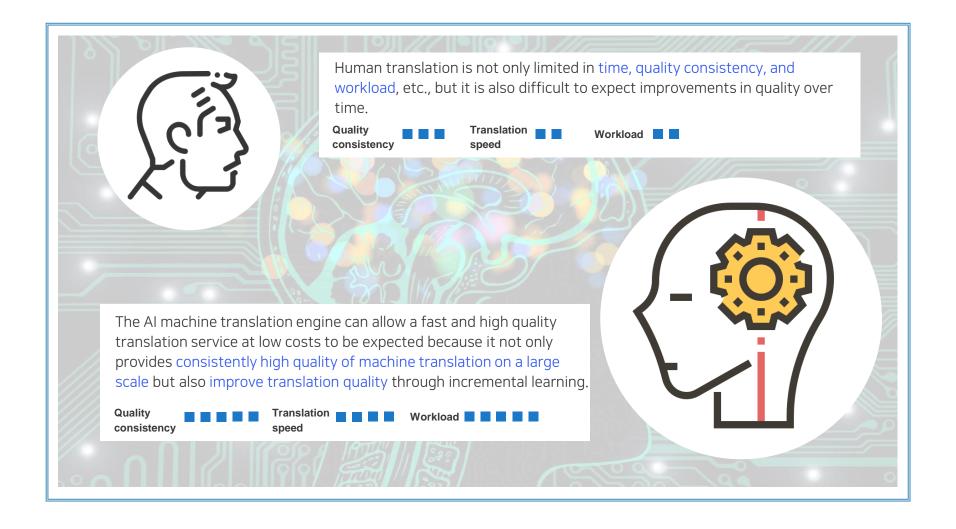

[Translation Performance Area Distribution Chart]

% What is incremental learning?

A deep learning method that improves the quality of machine translation in a particular field by further learning the translation knowledge in an artificial neural network machine translation model.

Incremental Learning Application

Incremental Learning Use Cases

We have been steadily working with the Ministry of Science and ICT, the Electronics and Telecommunications Research Institute, and the National Information Society Agency Korea on the construction of artificial neural network machine translation learning corpus. The Al law translation specialized service (LAW@EVERTRAN), which was developed based on this, was introduced to the Al HUB operated by the National Information Society Agency Korea under the Ministry of Science and ICT, and the National Law Information Center under the Ministry of Government Legislation as a use case.

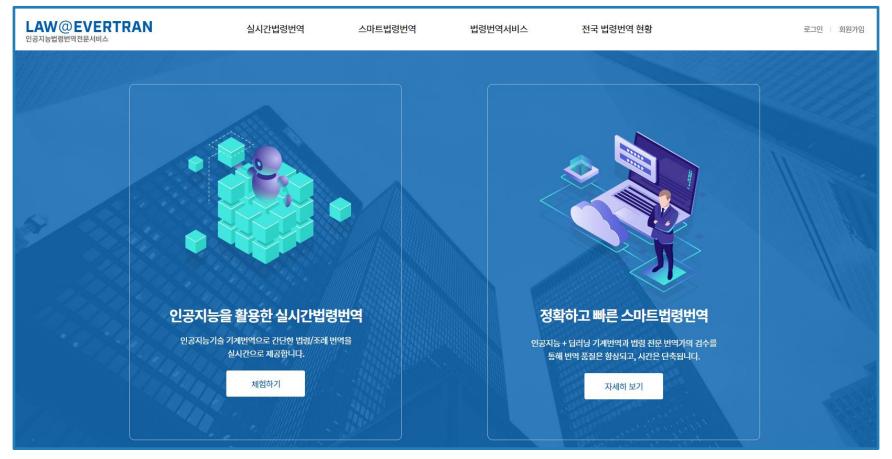

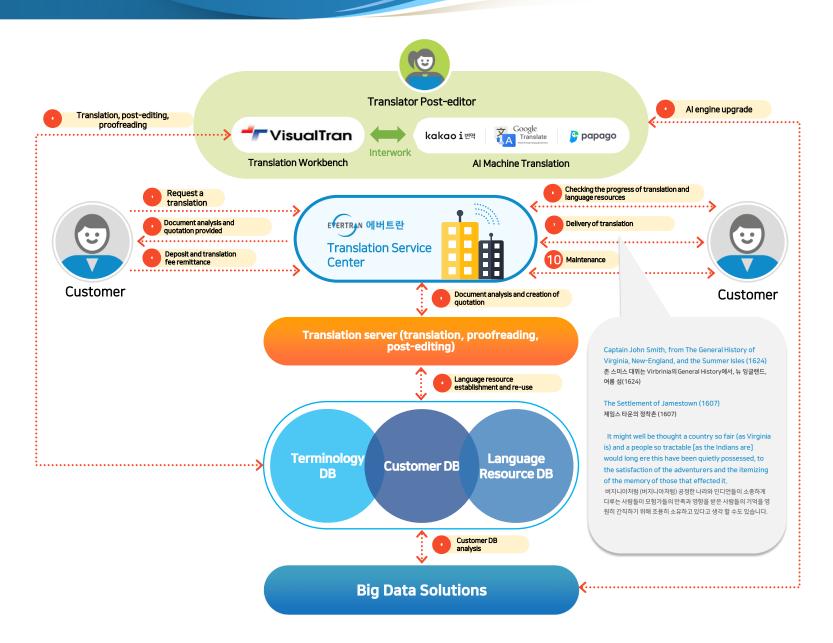

National Information Society Agency Korea Al HUB Ministry of Government Legislation National Law Information Center **Press Releases**

Incremental Learning Use Cases

LAW@EVERTRAN, an Al law translation service, is the first and only open API-type translation service platform in Korea that utilizes incremental learned artificial intelligence machine translation engines, and will provide high quality services to workers, developers, researchers, local governments, and foreigners living in Korea.

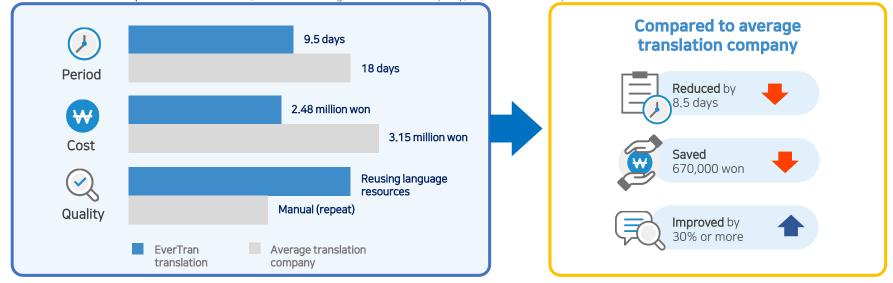

Because we analyze the original text to find repeated phrases, reused sentences, and parts that do not require translation and discount the translation fee accordingly, you can reduce the translation cost by about 30% with us compared to other companies.

Translation	Total Number	Number of	Number of	Average Translation Company		EverTran Translation				
Material (Example)	of Words Translated	Non-repeated Words		Translation fee (*)	Time required for translation (**)	Language building, reuse	Translation fee (*)	Time required for translation (**)	Language building, reuse	Effectiveness of Service
Manual 2	25,000 words	20,000 words	5,000 words	1,750,000 won	10 days	Impossible	1,485,000 won	5.5 days	Possible	 Saved 265,000 won from translation fee Time required for translation shortened by 4.5 days
Instructions 2	20,000 words	10,000 words	10,000 words	1,400,000 won	8 days	Impossible	990,000 won	4 days	Possible	- Saved 410,000 won from translation fee - Time required for translation shortened by 4 days

Calculation for translation fee (based on average translation company): English > Korean 70 won/word, calculation for time required for translation (based on average translation company): 2,500 words/day

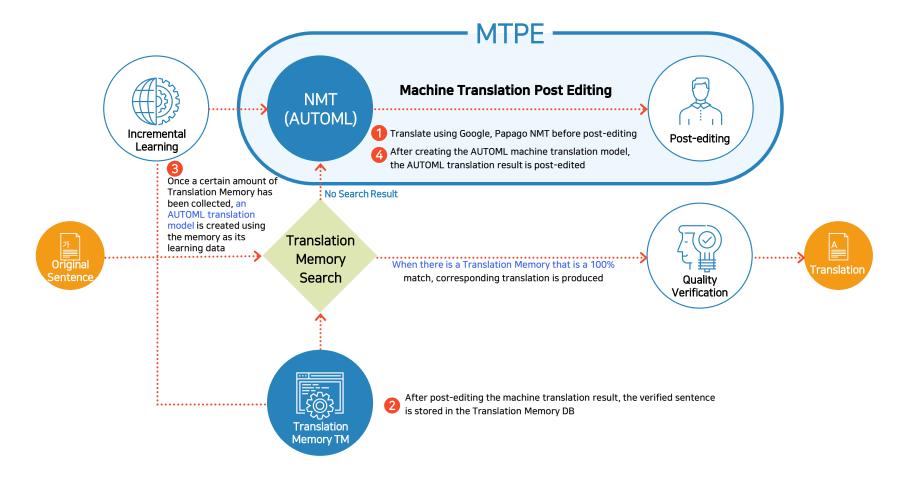

Translation S/W & Solution Solutions

VisualTran-AutoML MTPE translation platform is a comprehensive language knowledge management system designed for innovative translation work within an organization.

VisualTran Mate analyzes the source texts (sentences to be translated) written in the MS-Office file format (Word, Excel. and PowerPoint) and Hancom file format (HWP) in translation units and allows users to translate them by reusing repeated sentences and terms as Korea's first translation memory-featured computer aided translation.

VisualTran Mate translation memory function allows users to translate with unified terms and styles, and in particular, allows them to quickly translate all office documents around the world in their original formats because it is possible to make one-click automatic translation linked with Google, Papago, and Baidu.

AUTOML Translation Model

[A screenshot of the VisualTran translation palette showing the Google and Papago translation results and search result of registered words]

- Since it is not possible to achieve perfect translation quality through the use of glossary alone, regardless of the types of machine translation engine around the world, our company provides translation memory technology, which saves the results of human translations into the VisualTran-AutoML MTPE translation platform to be reused.
- Applying user-built glossaries to any machine translation engine provides functions that can use the quality of the best machine translation engines.

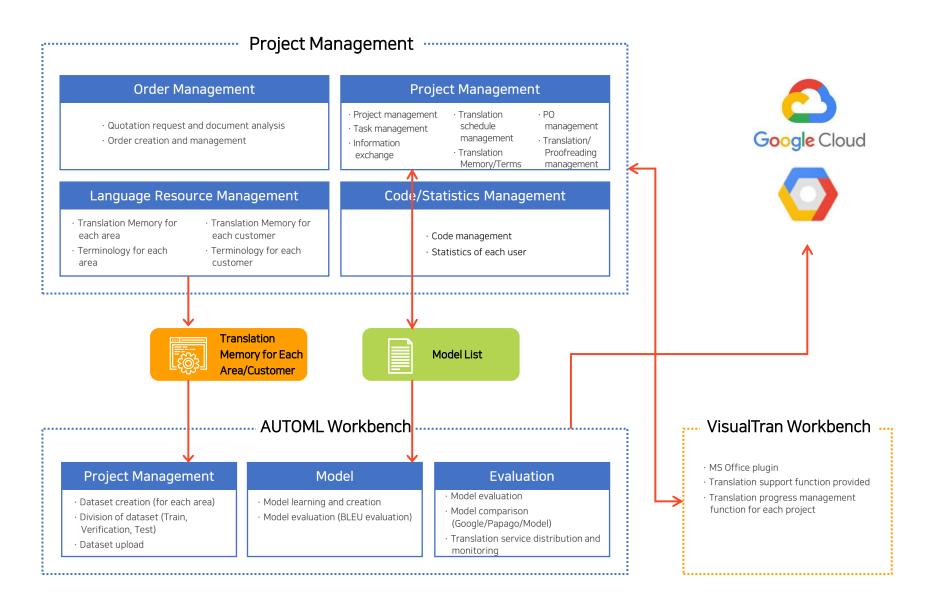

Calculated based on BLEU (Bilingual Evaluation Understudy Score) to evaluate the quality of AUTOML translation and Google translation.

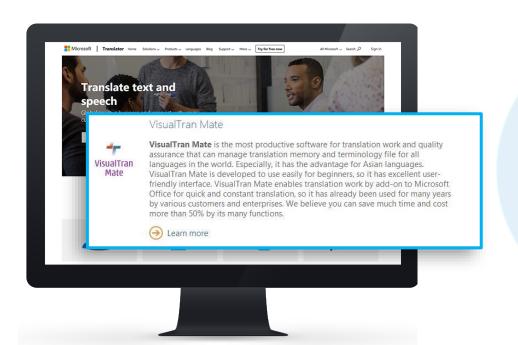

Electricity and Electronics Patents Area (Case 1)_English Korean (English → Korean)							
Number of Corpus	AUTOML Translation	Google Translation	Higher by				
318,720	85.033	61.43	23.603				

Legal Area (Case 2)_Korean English (Korean → English)							
Number of Corpus	AUTOML Translation	Google Translation	Higher by				
480,000	46.54	33.41	13.13

Strengths of VisualTran-AutoML MTPE Translation Platform

Over 50% reduction in translation time and translation fee

Microsoft company homepage

//

The VisualTran-AutoML MTPE translation platform, a language resource management system, is a server solution that manages projects in VisualTran Mate, a translation support tool. Communication technology enables you to manage projects in detail, including the translators' work progress, Translation Memory, glossary, and so on. In addition, as functions including Translation Memory and glossaries can be used in cases of joint translation projects through the VisualTran-AutoML MTPE translation platform, you can save up to 50% of translation costs, while also assuring consistent translation quality by using this top-notch translation support server solution.

Those in charge of translations, translators or proofreaders of companies, research institutes, and public offices can construct the results of translations through Translation Memory and Binary Dictionary and the data constructed can be managed comprehensively and systematically using the database and management program. Also, use of automatic translation solution allows rapid access to foreign information.

Speech for 10th Anniversary, 2021 (From the White Book)

Speech for 10th Anniversary, 2021 (From the White Book)

138 한국법령정보원 10년사 2021

3. 세계법제정보센터 (번역 솔루션 업체)

세계법제정보센터 소개

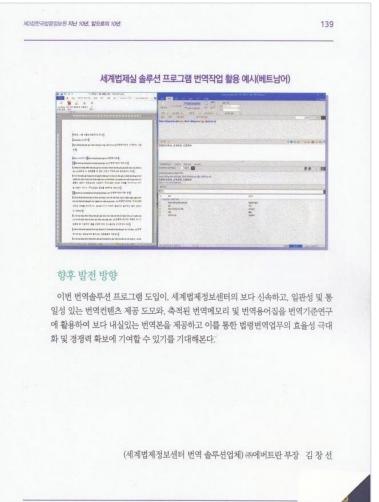

"세계법제정보센터"는 세계 각국의 법령정보(원문본, 번역본)와 맞춤형 법령정보 서비스, 최신 법제동향 등을 제공함으로써 우리 국민, 기업, 정부의 활동을 지원하는 국내 최대의 세계법령정보 포털 사이트다. 또한 2021년 현재 해외 55개 국가, 지역, 기구의 법령을 수집 및 번역하여 대국민서비스로 제공하고 있다.

번역솔루션 프로그램 도입 목적

세계법제실 내부의 보다 완성도 높은 번역컨텐츠 제공을 위하여 법령번역업무에 활용되는 번역솔루션 프로그램은 MS-Office (Word, Excel, PowerPoint)와 한글(HWP) 문서 등 다양한 포맷과 호환되며 세계법제정보센터에서 제공되는 11개의 언어권별(영어, 중국어, 일본어, 프랑스어, 스페인어, 러시아어, 아랍어, 베트남어, 말레이어, 인도 네시아어, 태국어) 번역내용 및 번역용어 DB를 축적하여 번역 컨텐츠의 통일성·정확성을 제고하기 위함에 그 목적이 있다.

도입 효과

번역솔루션 프로그램은 세계법제실 내부의 보다 완성도 높은 번역컨텐츠 제공을 목적으로 언어권별 번역작업 및 번역기준연구에 활용될 수 있고, 프로그램 사용 시 Google 등 인공신경망 기계번역을 참고하여 법령 초벌번역작업에 활용될 수 있으며, 번역작업 시 등록한 법률용어가 또 다른 문장을 번역할 때 해당 용어가 다시 나오면 번 역 팔레트창에서 그 용어 및 의미를 제시하여 줌으로써 일관성 있는 용어사용에 유용 하다. 또한 번역솔루션 프로그램을 통하여 기 번역되어 축적된 번역메모리를 활용하여 통일성 있는 번역컨텐츠 작성을 도모할 수 있다.

We will be a company that focuses on quality translation.

Evertran Co., Ltd. provides high-quality and highly efficient translation services at low costs by integrating the global translation service knowledge we have accumulated during our 20 years of service into the Big Data and Al technology, the key technology of the 4th Industrial Revolution.

We at EverTran will make every effort to provide the best translation services until our customers are fully satisfied. Thank you.
