Translation services fusing technology and people

EverTran translations

We provide translation services that fuse technology and people. We deeply move customers and lead them to success by a Language Service Provider (LSP) that swiftly provides the best-quality work at an affordable price. We utilize big data and a computerized translation system (which includes industry-specific terminology databases) and an artificial intelligence machine translation system that will lead the Fourth Industrial Revolution.

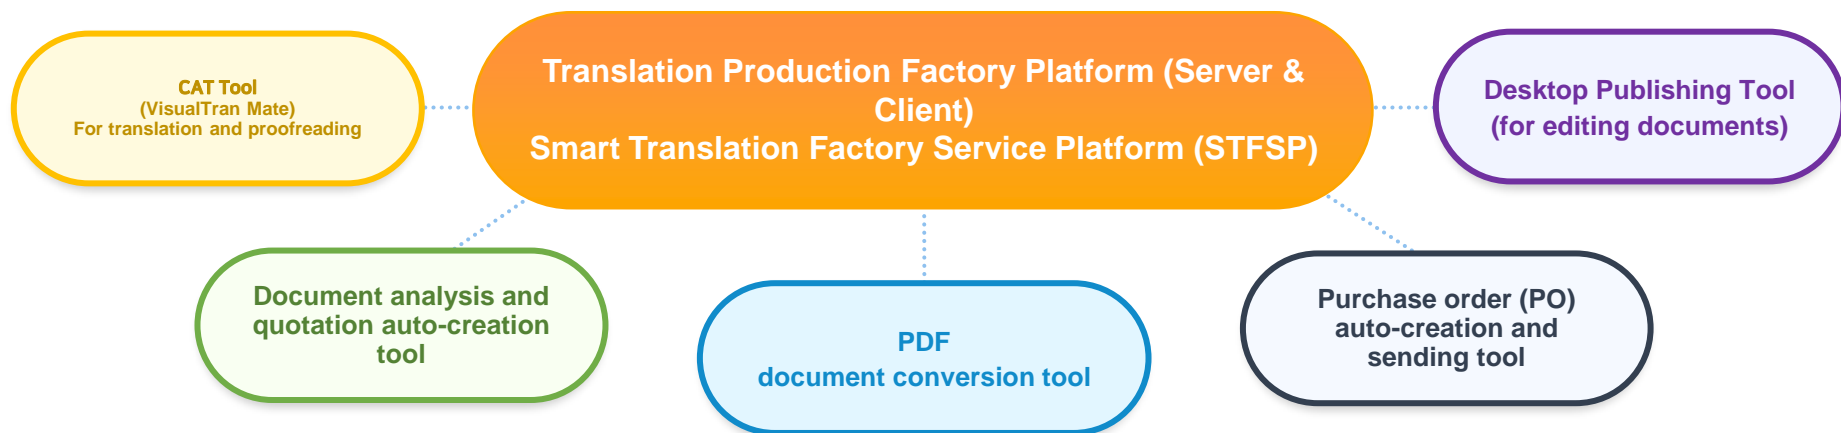

Number of translators per language and specialized field

Category	English	Chinese	Japanese	German	French	Spanish	Russian	Arabic	En ↔ Ch	En ↔ Jp	Other special languages
Technology/Engineering	52	35	30	15	13	8	8	7	6	5	16
IT	30	20	25	13	11	9	8	8	5	6	17
Business	35	20	25	15	12	12	10	8	5	4	15
Law	25	22	20	13	11	10	9	9	4	5	16
Standard Certification	42	31	25	15	9	8	7	5	6	6	20
Finance	30	15	15	12	8	7	7	6	4	6	15

Content Media

EverTran's translation services are divided into 5 steps and a total of 20 sub-fields:
Artificial intelligence, big data system, translation process and project management system, translation partners (translators / proofreaders) and the selection / recruitment / evaluation management system
to provide high-quality translation services through experts in the field.

Fast delivery

We provide a fast delivery of translation services through a conveyor belt-like system from the original document receipt to project schedule management, language service provider assignment, translation and proofreading, delivery, etc., having professional translators and process module interworking in each step of the process under this platform.

Group of language experts from around the world

Using language processing analysis solutions, the language processing analyst accurately analyzes the document to establish a strategy for optimum translation, and the translation task is assigned to a professional translator with extensive experience to perform an optimized translation.

Considerable experience in fulfilling translation orders

Recognized for advantages such as translation quality assurance, affordable translations, fast delivery and reliability, we have received numerous orders from customers such as companies, research institutes, and government offices such as Gyeonggi Province (South Korea), the Korea Federation of Small and Medium Business, and many other companies.

Acknowledged by the South Korean government and Microsoft (MS)

Our company's technology is recognized by the South Korean government through acknowledgments such as the INNOBIZ technology innovation certification, venture business certification, ISO translation quality certification, and translation services with the highest quality satisfaction rating of 2017 in Korea. We are also registered as a translation partner with Microsoft.

Reusing language resources

By translating on the translation platform, we build a glossary of terms and a translation database on the language resource server and reuse relevant terms. Therefore, as you request more translation work, the translation quality becomes higher while the cost becomes lower.

Translation and proofreading using translation tools

Under the powerful translation platform consisting of big data, a computer translation system and artificial intelligence machine translation system, the translations and proofreading are carried out by language experts in each field using a standardized process system and manuals.

Provides comprehensive translation consulting analysis

We receive the original texts in various ways such as homepage, email, and cloud storage, and analyze the documents through document analysis on the translation platform. Then, we provide "comprehensive translation consulting analysis" reflecting the requirements of customers who request translations.

Differentiated services

Language resources (original, translation and terminology) and information on translation orders and payments can be accessed via PC and mobile, and files (including the original text and translation) and a glossary of terms are provided for quick inspection and utilization upon delivery.

Specialized databases for various industries

By systematically building specialized databases in more than 30 industry sectors and using them for translations, the translation quality is improved through the unified and consistent use of terms.

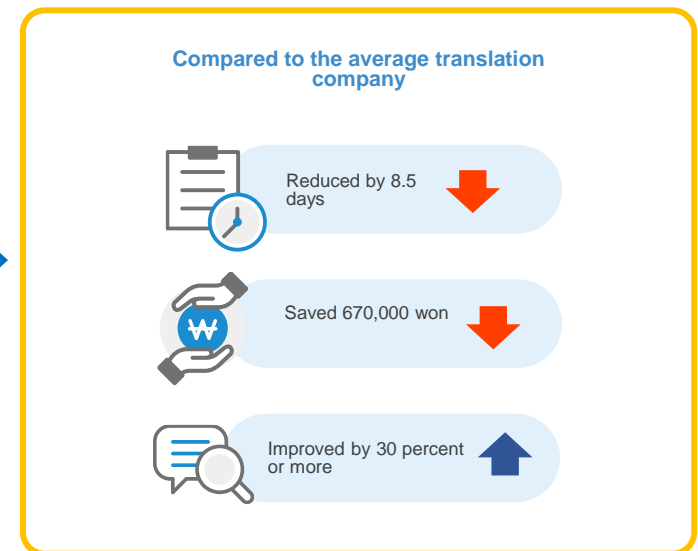

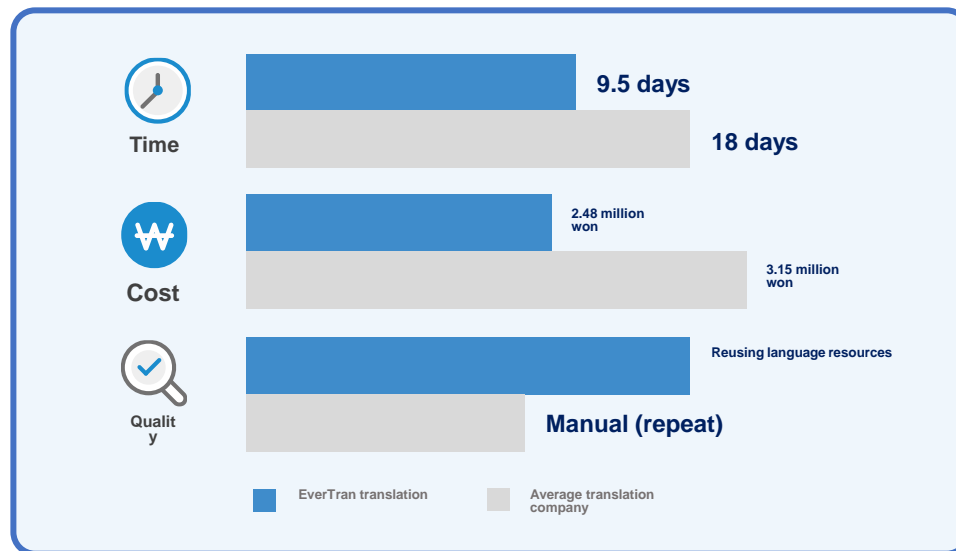

Operates a management system of language service providers

We thoroughly validate the qualifications and abilities of language service providers (LSP), such as translators, proofreaders, and post-editors around the world, through methods such as an application process and IT and translation competency testing.

By analyzing the original text to find repeated phrases, reused sentences and parts that do not require translation, you can **reduce the translation cost by about 30% with us compared to other companies.**

Translations (Example)	Total translation word count	Non-repetitive word count	Repeated word count	Average translation company			EverTran translation			Effectiveness of the service
				Translation fee (*)	Time required for translation (**)	Language building, reusing	Translation fee (*)	Time required for translation (**)	Language building, reusing	
Manual 2	25,000 words	20,000 words	5,000 words	1,750,000 won	10 days	impossible	1,485,000 won	5.5 days	possible	Translation cost reduced by 265,000 won Shortened time required for translation by 4.5 days
Instructions 2	20,000 words	10,000 words	10,000 words	1,400,000 won	8 days	impossible	990,000 won	4 days	possible	Translation cost reduced by 410,000 won Shortened time required for translation by 4 days

Calculation for translation fee (based on average translation company): English > Korean 70 won/word, calculation for time required for translation (based on average translation company): 2,500 words/day

We specialize in quality translations

Based on language processing technology and IT source technology, we provide optimized translation services by developing internationally competitive computer-aided translation solutions and translation service platforms. Thank you for your consideration.
